(54) INFORMATION PROVIDING PROGRAM, COMPUTER-READABLE RECORDING MEDIUM WHICH RECORDS INFORMATION PROVIDING PROGRAM AND INFORMATION PROVIDING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To flexibly cope with various terminals without making any alterations to contents stored in an information source.

SOLUTION: When a request for access to contents is made, the kind of a connection terminal is specified at a device selection part 18 according to a protocol header, and a display capability of the connection terminal is determined by referring to device information DB 12. Through a USP 24 (a USP 24A for connection to a portable phone in an illustrated example) corresponding to the kind of the connection terminal and a form of data of the contents, XML contents are obtained from the information source. The XML contents become XHTML contents which have been arranged according to the display capability of the connection terminal by referring to an SXML template DB 16 at a plug-in mechanism 22. The XHTML contents are converted into a form conforming to the connection terminal at a conversion part 26 corresponding to the display capability of the connection terminal after, if necessary, they are divided into a plurality of contents, and sent back.

LEGAL STATUS

[Date of request for examination] 09.12.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration] withdrawal

[Date of final disposal for application] 09.01.2007

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
